THE LINDALE INDEPENDENT SCHOOL DISTRICT
EDUCATING EVERY CHILD EVERY DAY

January 29, 2026
For Immediate Release

TEXAS MOBILE STEM LAB TO VISIT LINDALE INDEPENDENT SCHOOL DISTRICT

The Learning Undefeated Texas Mobile STEM Lab will be on-site at EJ Moss Intermediate from February 10-12 to provide engaging, immersive, hands-on STEM experiences for our fifth grade students and teachers.

The mobile lab is operated by nonprofit organization Learning Undefeated, in partnership with the Texas Education Agency. This program is funded by TEA and provided to schools free of charge. The Texas Mobile STEM Lab program currently operates out of Explorer7, Learning Undefeated's newest mobile STEM lab. Explorer7 features bold, colorful graphics inside and out and touchscreen televisions at each student workspace.

Onboard the Texas Mobile STEM Lab, students solve engineering design challenges and work cooperatively. Curriculum on the lab is a set of model STEM activities that integrate content knowledge and are fully aligned to the Texas Essential Knowledge and Skills (TEKS).

This is the fourth year of the program, and our school was chosen out of hundreds of eligible schools that applied.
